

Deepavali Word Problems!

1. Ravana is often shown with 10 heads. Where do you think these heads are placed? Draw a picture to demonstrate. How do you think this affects his balance?
2. If Ravana has 2 arms for each of his 10 heads, what is the total number of arms that Ravana has?
3. Gayatri plans to line each side her rectangle-shaped driveway with an equal number of diyas. She has 18 diyas. How many diyas can she place on each side of the driveway?
4. The Diwali fireworks show in New Delhi lasts 683 seconds. About how many minutes is that? Round to the nearest minute.
5. Mehul is packing Diwali mithai boxes. He needs to pack 16 boxes. Each box will contain 4 pieces of mithai. How many pieces of mithai will he need to make the 16 mithai boxes?
